

Advanced Construction Skills Centre

Sponsorship Packages
2021

Background

City of Bristol College is opening its **Advanced Construction Skills Centre** in September 2021 and we are inviting selected partners to sponsor this amazing new Centre in a variety of ways.

The £9m 3,500 square metre Centre is based in south Bristol alongside our South Bristol Skills Academy. It will offer a range of construction courses including higher-level training such as management and quantity surveying, and green and sustainable construction. The Centre will boast impressive state-of-the-art facilities and provides a space fit for the industry. Its whole purpose is around providing modern facilities where we can train people in all areas of construction to develop the skills workforce employers need in the years ahead.

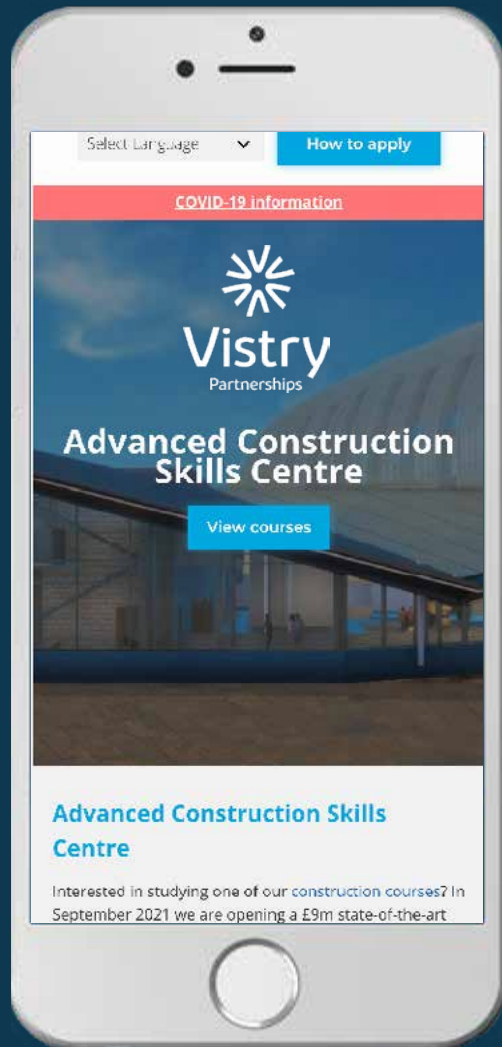

You can use this opportunity to raise awareness of your own company or simply show your organisation's support of education and training, or the local community in general. By providing sponsorship, you will position your product or service with a College known for enriching the lives of thousands of people in Bristol and beyond each year. The Centre will have a high-profile official opening in September 2021 and all sponsors will be invited to this prestigious event.

There are several levels of sponsorship for your consideration, including overall sponsorship of the Advanced Construction Skills Centre, individual workshops and all of the high-vis clothing which each and every student and staff member will wear while attending the Centre. To discuss the options or to confirm your support, please email rebekah.wilkins@cityofbristol.ac.uk

Let us help you build your business. We look forward to hearing from you.

Headline Centre Partner

SOLD
