# Art & Design courses

## Useful resources

Students can get set up on the following online platforms to undertake initial research based projects

- Pintrest
- BeHance
- Designspiration

# Year 11 Transition Tasks

CITY of BRISTOL COLLEGE

## Art & Design courses

### Task

Students should look at visual examples of imagery that they like and start building a resource bank, either by tagging images they like or downloading them.

The task is to categorise them, - what are they and who are they by.

Students should write a short annotation that summarises why they like it. There is no trick here, just be honest, was it the colour, the texture, was it the content of the picture, was it the style. Whatever the reason, just explain why.

### Task – Using research to inform

The task is to find any artist or designer, working in any discipline and do some research into them

Firstly look at them from a biographical aspect - their background, history, time period they lived in etc.

Next look at their work and find 3 pieces, where possible that shows a difference in style, and just write about the visual content from your own point of view. Answer the questions, what do you like / don't you like about it, what do you think it is communicating, what does it make you feel, is there anything you feel could be improved?

Present the work in any format you wish, depending on what you have access to.

Create a piece of art or design work based on the work of your chosen artist or designer. Pick any content or subject as the focus, but try to replicate the style of the artist/design in your own way based on what you have access to.
